

Hampton Green Energy Committee

June 16, 2019

Dear Hampton Homeowner,

The Hampton Green Energy Committee has been working since 2010 to bring energy savings and clean renewable energy to Hampton. We have made our town buildings more energy efficient, put solar on town buildings, hosted an electric car show, and held educational forums, film series, and energy fairs for residents to help make their homes more energy efficient.

We are working alongside other towns and cities throughout Connecticut and across the country to transition to 100% clean, renewable energy. The goal is to offset the amount of nonrenewable energy used in town with the generation of renewable energy elsewhere in town.

In order to understand how much energy we need to generate, we must first know how much energy we use. We can use your help figuring that out. Would you please answer the following questions for us and return this questionnaire to us by **July 20th**. All information will remain confidential.

1. How do you predominately heat your house?

- Oil
- Wood Stove
- Outdoor Wood Furnace
- Geothermal
- Heat Pumps
- Propane
- Passive Solar
- Other, please specify what kind?

2. Do you have your own solar installation to generate your electricity? Yes No

How many kW is your system?

Do you have battery backup? Yes No

3. Do you have a solar thermal installation to heat your water? Yes No

4. Do you have a hybrid hot water heater? Yes No

5. Do you have an all-electric car? Yes No
What make and model?

6. Do you have a hybrid car? Yes No
What make and model?

7. How many motor vehicles do you have that are used on the roads?

What is your average total mileage per year for all vehicles combined?

8. Has your house had a Home Energy Audit? Yes No

9. Do you have insulation in your attic? Yes No
In your walls? Yes No

10. Do you use LED light bulbs? Yes No
For approximately what percentage of your house/apartment?

11. What other energy efficiency measures have you taken?

12. Please let us know if you would like to attend presentations on: household energy efficiency; residential solar; films on climate change; Hampton energy campaign; electric cars; light bulb exchange

Other _____

13. I am interested in becoming a member of the Green Energy Committee.

Optional information
